

The JET line represents a family of self-priming pumps, each equipped with a built-in ejector featuring high suction capacity. These pumps, with their multivoltage capability are designed to simplify installation and operation through the inclusion of a pressure switch.

Key Features

Copper winding.

Robust Iron cast body pump and support .

Brass impellers.

Stainless steel shaft.

Single phase motors 60hz and multivoltage IP 44.

Maximum aspiration up tp 26 feet.

Bulit-in thermal protector.

Suitable for continuous use,

Recommended Applications:

Aspiration in open wells and cisterns.

Home pressurization systems.

Cars wash facilities.

Light industrial services.

Small irrigations Pumps.
