STAINLESS STEEL JET PUMP

Introducing our self-priming stainless steel electric pumps with a built-in ejector. With a compact and elegant design, they are suitable for pumping clean water free from impurities in multiple applications.

Key Features:

SS304 stainless steel pump body.

Copper winding.

Brass impeller.

Stainless steel shaft.

Single-phase motors IP44 Class B.

Power options ranging from 0.5HP to 1.5HP.

Maximum liquid temperature °F104

Built-in thermal protector.

Maximum suction capacity of 29 feet.

Low noise operation.

Suitable for continuous use.

Recommended Applications:

- Home pressurization systems.
- Vehicle washing.
- Light industrial services.
- Aspiration in open wells and cisterns.
- Small irrigation projects.

19591 NE 10th Ave - Miami, FL 33179 - BAY F & G
